No. D/1290 of 1915.

Office of the Surgeon-General
with the Government of Bombay:

Poona, 17th May 1915.

From

The Honourable Surgeon-General R. W. S. LYONS, M.D., I.M.S.,
Surgeon-General with the Government of Bombay;

To

The SECRETARY to GOVERNMENT,
General Department, Bombay.

Sir,

I have the honour to submit, for the information of Government, the Triennial Report on the Lunatic Asylums of the Bombay Presidency for the years 1912—1914.

Buildings and Repairs.

2. During the triennium under report the new Central Asylum at Yeravda was opened and the Asylums at Colába and Poona were closed. The new asylum is still incomplete and stands in urgent need of the following additions:—

(1) Provision of accommodation for insane lepers.

(2) Bath houses.

(3) Laboratory.

(4) The provision of wards of one bed each in Hospital.

(5) Additional quarters for staff.

(6) Railing to separate sections.

(7) New criminal section.

(8) Provision of padded and strong rooms.

3. The annual repairs to the asylum buildings have been carried out by the Public Works Department.

4. At Ratnágiri Asylum two new barracks and three cells were added and certain unused quarters were converted into five separate cells, a disused bath-room was converted into a mortuary, the compound wall of the female yard was re-constructed and the Female Hospital, sanctioned in 1913, was completed.

5. At Dhárwár Asylum barracks and cells for 30 female patients were provided, the old female cells were altered for the accommodation of 13 criminal male lunatics, and ridge ventilation added to all the old cells of the Asylum which, having been built back to back, were badly ventilated.

6. At Ahmedabad Asylum 26 cells were added and a new office and dispensary were constructed over the porch of the Asylum.

7. At Hyderabad Asylum 4 new cells for confining dangerous lunatics were constructed in the criminal yard.

8. Owing to the increase in the number of insanes who are being sent to Asylums, additional accommodation will be required in the near future as follows :—

	Non-Criminals.			Criminals.		
	M.	F.	T.	M.	F.	T.
Yeravda	72	24	96	25	6	31
Naupada, Thána	*44	31	75	38	15	53
Ratnágiri	10	3	13	5	0	5
Dhárwár	30	5	35	.....		
Ahmedabad	25	10	35	10	0	10
Hyderabad	60	10	70	0	5	5

* Accommodation for 32 males sanctioned in Government Resolution, Public Works Department, No. C. W.-2179, dated 6th November 1911.

Water-Supply.

9. The supply of water for the use of the patients and staff has been sufficient at all the asylums. The Central Lunatic Asylum, Yeravda, is supplied with drinking water from the Karakwasla lake. The introduction of river water for gardening and flushing purposes has been proposed and a scheme is under consideration. At Naupada the supply from the asylum well is deficient during the latter part of the hot weather. It is advisable, as pointed out in the report for 1912, that this asylum should be given a piped supply. At Dhárwár, pipe connection brought from the Kalgeri tank has been sanctioned and the work is being carried out by the Irrigation Engineer.

STATEMENT No. I.

Total population.

10. The total number of insanes admitted and readmitted into the asylums during the year 1914 was 404 males and 82 females as compared with 337 males and 71 females in 1913 and 353 males and 76 females in 1912. The average admissions during the years 1912-1914 numbered 365 males and 76 females against 309 males and 66 females in 1909-1911 an average increase of 17·6 per cent. during the three years. For the three years 1906 to 1908 it was 19·2 per cent.

11. The total population of the asylums during the year 1914 was 1,575 against 1,450 in 1913 and 1,458 in 1912. The mean population for the triennium averaged 1,197 males and 297 females, an increase of 107 males and 27 females (9·8 per cent. and 10·0 per cent. respectively) over the previous triennium 1909-1911. The average increase was shared mainly by the Ratnágiri, Dhárwár, Ahmedabad and Hyderabad Asylums. There was a decrease of about 15 per cent. in the mean population of the Naupada Asylum due to the admission of many insanes to the new Central Asylum at Yeravda, who would, under previous arrangements, have been admitted to the Naupada Asylum. The mean European population rose from 51 in 1909-1911 to 59 in 1912-1914 an increase of 15·6 per cent.

Daily Average Strength.

12. The daily average strength in 1914 was 1,112·3 as compared with 1,105·3 in 1913 and 1,048·9 in 1912. The mean daily average strength for the years 1912-1914 was 1,088·8 against 998·2 for 1909-1911.

13. As remarked by my predecessor in the previous Triennial Report (1909-1911), the steady increase in the number of patients in the asylums is partly due to the growing popularity of the institutions and partly to social and economic considerations which render their neighbours less tolerant of annoyance by insanes and their relatives less able to maintain them.

Discharges and Cures.

14. Of the total treated, an average of 140 males and 22 females were cured during the triennium as compared with 111 males and 19 females in 1909—1911. The mean ratio of cures for 1912—1914 was 15·3 males and 9·2 females against 14·1 males and 9·1 females for 1909—1911.

15. Of the insanes returned as "transferred to friends" the average number shown as "improved" for 1912—1914 was 73 and "not improved" was 28 as compared with 77 and 26 for 1909—1911.

Sickness.

16. The daily average number of sick treated in Hospital in 1914 was 30·4 against 52·1 in 1913 and 39·8 in 1912, the mean of the triennium being 40·8 against 28·8 of the previous triennium. This increase is due to the large number of admissions into Hospital at Yeravda Asylum owing to depressed and refractory patients and those refusing food being treated as hospital cases. The percentage of sickness to the daily average strength was 2·7 against 3·8 in both 1912 and 1913, the average ratio for the triennium being 3·4 against 2·8 for the period 1909—1911. The general health of the insanes was on the whole satisfactory.

Mortality.

17. The number of deaths fell from 160 in 1912 to 106 in 1913 and 92 in 1914, the average mortality for the triennium being 119 against 115 for the three years 1909—1911. The ratio per cent. of deaths to the daily average strength was 8·3 as compared with 9·6 in 1913 and 15·3 in 1914. The mean death-rate to the daily average strength during the years 1912—1914 was 10·1 against 11·5 in 1909—1911.

18. The following table shows the ratio per cent. of deaths to the daily average strength at the several asylums during 1909—1911 and 1912—1914, respectively :—

		1914.			1913.			1912.			Mean of 1912-1914.			Mean of 1909-1911.		
		Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
Colaba	E.	...	...	...	...	...	...	14·9	7·4	11·9	E 14·1	...	10·8	4·5	...	3·0
	I.	...	...	...	2·6	4·8	3·4	14·9	6·8	12·0						
Poona		...	...	...	6·7	...	5·5	21·2	4·0	17·8						
Central Lunatic Asylum, Yeravda.	E.	13·8	...	7·7	13·8	6·0	10·4	...	...	...	I 10·2	3·1	8·3	10·7	14·6	12·0
	I.	10·1	2·4	8·0	7·1	1·4	5·6	...	...	...						
Naupada, Thána ...		6·9	10·3	7·5	17·1	11·8	16·	24·6	54·7	30·4	16·4	28·0	18·5	25·6	34·4	27·4
Ratnágiri		4·8	11·7	6·9	7·3	3·3	6·4	6·0	4·0	5·6	5·7	7·3	6·1	2·5	3·8	2·8
Dhárwár		16·4	33·1	20·9	3·9	3·3	3·7	1·5	16·0	5·4	6·9	18·1	10·0	4·4	...	3·3
Ahmedabad		5·6	7·7	6·0	5·1	4·5	5·0	7·3	...	6·2	6·0	4·4	5·7	5·8	5·3	5·7
Hyderabad		5·5	5·6	5·5	9·9	15·4	10·7	13·9	8·1	13·4	9·6	12·3	9·8	11·3	...	10·5

19. In 1912—1914 the average number of deaths among the European inmates was 4 in an average population of 36·9 while in 1908—1911 it was 1 in an average population of 32·6. The death-rate at Yeravda (Indians) Naupada and Hyderabad is lower than during the previous triennium. The numbers were the same at Ahmedabad for the two triennial periods. The high death-rate at Dhárwár was due to the fact that a number of deaths occurred among patients who had been in the asylum a very long time and had reached an advanced age. In Ratnágiri it was due to the bad state of health in which many of the patients were admitted. Out of the 9 patients who died in 1914, 2 died of tubercle, 3 of epilipsy, 1 of tetanus, 1 of cerebral hæmorrhage shortly after admission. In all the asylums taken together the principal causes of death were dysentery, diarrhœa and tuberculosis.

Statement No. II.

Criminal Lunatics.

20. The total number of criminal insanes confined in the asylums in the year 1914 was 229 of whom 214 were males and 15 females as compared with 227 composed of 212 males and 15 females in 1913 and 211 composed of 197 males and 14 females in 1912. The average population for the triennium was 208 males and 15 females against 184 males and 15 females in 1909—1911. The daily average strength was 170·3 against 189·0 in 1913 and 155·5 in 1912, the mean strength for the three years being 171·6 against 157·2 for 1909—1911 an increase of 9 per cent.

Statement No. III.

Religion, sex and residence of the insanes admitted.

21. Of the total admissions, including re-admissions, there were :—

	1914.	1913.	1912.	Average.	
				1912-1914.	1909-1911.
Hindus	256	222	224	234	201
Mahomedans	140	177	119	145	103
Europeans and Eurasians ...	48	26	24	33	22
Indian Christians	22	25	25	24	21
Other caste	20	18	37	25	28
Total ...	486	468	429	461	375

Statement No. IV.

Previous occupation of the insanes admitted.

22. Labourers gave the largest number of admissions during the triennium under review, followed by merchants and traders, domestic servants, cultivators, clerks, mendicants and artisans. The admissions of soldiers increased from 2 in 1912 to 6 in 1913 and 15 in 1914.

Statement No. V.

Ages of the insanes admitted.

23. The admissions and re-admissions according to age were as under :—

	1914.	1913.	1912.	Average.	
				1912-1914.	1909-1911.
Under 20	37	34	22	31	28
Between 20 and 40 ...	358	310	343	337	279
Between 40 and 60 ...	85	63	125	91	67
Upwards of 60	6	1	2	3	2

STATEMENT No. VI.

Types of Insanity.

24. The various types of insanity treated during the three years 1912—1914 as compared with the mean of the preceding three years 1909—1911, and the results attained are sumarized in the subjoined table:—

	Total treated.					Recovered.					Improved.					Not improved.					Died.				
	1914.	1913.	1912.	Mean of 1912-14.	Mean of 1909-11.	1914.	1913.	1912.	Mean of 1912-14.	Mean of 1909-11.	1914.	1913.	1912.	Mean of 1912-14.	Mean of 1909-11.	1914.	1913.	1912.	Mean of 1912-14.	Mean of 1909-11.	1914.	1913.	1912.	Mean of 1912-14.	Mean of 1909-11.

* Cases of insanity due to all forms of Indian Hemp are included under this head.

STATEMENT No. VII.

Ætiological factors and associated conditions in the insanes admitted.

25. The number of cases of insanity returned as due to alcohol was 28 against 21 in 1913 and 15 in 1912. Indulgence in bhâng, charas or gânja accounted for 46 cases as compared with 41 in 1913 and 49 in 1912. The cause of insanity was not ascertained on account of insufficient previous history in 140 cases against 78 in 1913 and 138 in 1912.

STATEMENT No. VIII.

Cash accounts.

26. The receipts from paying patients amounted to Rs. 33,323-12-3 as compared with Rs. 27,931-5-9 in 1913 and Rs. 28,190-3-9 in 1912, the average receipts for the triennium being Rs. 29,815-1-11 as compared with Rs. 27,819-11-0 in 1909-1911. The value of stores received from the manufacturing department, less cost of raw materials, increased from Rs. 3,405-0-0 in 1912 to Rs. 4,145-2-2 in 1913 and Rs. 5,557-15-6 in 1914, the average value for the past three years amounting to Rs. 4,369-5-11 against Rs. 3,979-11-3 for the years 1909—1911.

27. The total expenditure amounted to Rs. 3,42,955-1-6 against Rs. 3,19,633-13-4 (exclusive of the cost, Rs. 10,15,271 of building the new Central Asylum at Yeravda) in 1913 and Rs. 2,73,029-3-11 in 1912. Deducting the receipts from paying patients, the value of stores received from the manufacturing department and the amounts realised on account of the sale of goods to the public, etc., the net expenditure was Rs. 2,54,843-13-0 as compared with Rs. 2,46,217-4-6 in 1913 and Rs. 2,01,149-14-5 in 1912. Excluding the Public Works Department charges, the net expenditure for

the triennium under review, as compared with the mean of the preceding triennium, was :—

		Rs.	a.	p.
1914	... ...	2,02,938	5	10
1913	... ...	2,00,215	15	2
1912	... ...	1,63,789	12	8
Average ... 1912-1914	... ...	1,88,981	5	11
Average ... 1909-1911	... .	1,57,065	7	10

28. The net cost per head of daily average strength was Rs. 182-7-2 against Rs. 181-2-3 in 1913 and Rs. 156-2-3 in 1912, the mean for the triennium being Rs. 173-3-11 as compared with Rs. 157-5-7 for the previous triennium 1909—1911.

29. The average increase in the net expenditure was due to the increased number of patients treated and to an increase in the cost per patient, the latter being due to an increase of the establishments of the asylums and to higher prices, under the heads of diet, bedding and clothing, contingencies and medicines, as shown in the following table :—

	Establishment.	Diet.	Clothing and bedding.	Contingencies.	Medicines.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Mean cost. 1912-1914 ...	83,927 1 8	1,04,675 6 5	13,824 5 4	24,721 11 9	3,099 1 10
Mean cost. 1909-1911 ...	74,868 2 10	90,707 2 4	11,727 0 1	14,661 9 0	2,664 1 4

Amusements.

30. There was expended on the different forms of recreation and amusements provided for the insanes Rs. 2,114-8-1 during the year 1914 against Rs. 2,230-3-2 spent in 1913 and Rs. 2,053-2-0 in 1912, the average expenditure for the two triennial periods 1909—1911 and 1912—1914 being Rs. 1,590-1-8 and Rs. 2,132-9-9, respectively.

STATEMENT No. X.

Receipts and Expenditure on account of manufactures.

31. The total credits of the Manufacturing Department amounted to Rs. 9,987-7-7 and debits to Rs. 5,065-10-0, showing a profit of Rs. 4,921-12-7 in 1914 as compared with Rs. 5,346-6-1 in 1913 and Rs. 5,328-5-2 in 1912. The mean profit for the triennium was Rs. 5,198-13-3 against Rs. 4,295-8-2 for 1909—1911. The small loss of Rs. 267-4-4 shown against the Central Lunatic Asylum, Yeravda, is accounted for by the extra expenditure involved in the upkeep of the large gardens which have been started, carrying an initial heavy outlay.

32. The insanes continue to be employed as in the previous years, in gardening, the manufacture of clothing and in performing domestic duties in connection with the asylums. Those insanes who are capable of working in the factory are employed on weaving and cane work principally.

33. The average number of insanes employed on manufactures during the triennium was 347·1 against 346·9 in 1909—1911.

Visitors.

34. The attendance of visitors was on the whole satisfactory except at Ahmedabad. At Ahmedabad in 1912 one non-official visitor did not attend

on account of illness, in 1913 the Sessions Judge did not attend a single meeting and in 1914 a non-official visitor did not attend any meeting. He was absent from Ahmedabad during a great part of the year.

Management.

35. The management of the different asylums of the Presidency during the triennium under report has been satisfactory.

36. Difficulty still continues in obtaining a suitable class of men for work as warders although the pay of this class of servants has been somewhat improved.

I have the honour to be,

Sir,

Your most obedient servant,

R. W. S. LYONS, M.D.,
Surgeon-General, I.M.S.,
Surgeon-General with the
Government of Bombay.

BOMBAY: PRINTED AT THE GOVERNMENT CENTRAL PRESS.

Annual Reports.—
Triennial Report on the Lunatic Asylums in the Bombay Presidency for the years 1912—14.

No. 4923.

GENERAL DEPARTMENT.

Bombay Castle, 22nd June, 1915.

Letter from the Surgeon General with the Government of Bombay, No. D.-1485, dated the 29th May, 1915 :—

"I have the honour to forward the Triennial Report on the Lunatic Asylums of the Bombay Presidency for the years 1912—14, and to state, for the information of Government, that there is nothing in it the immediate publication of which can be considered of doubtful expediency."

ORDER.—The principal event of the triennium was the opening in 1913 of the Central Asylum at Yeravda and the consequent closure of the Colaba and Poona Asylums. The new institution had an average population of 340 inmates and will soon require to be provided with additional accommodation.

2. A steady increase is observable from year to year in the number of admissions to the asylums of the Presidency; but this tendency appears to be explainable by causes other than any general increase in the prevalence of lunacy among the people.

3. In connexion with the last triennial report reference was made to the high rate of mortality recorded at the Naupada Asylum. Thanks in part, no doubt, to certain precautionary measures taken, there has, since then, been a considerable improvement in this respect, though Naupada is still the least healthy of the asylums of the Presidency and will probably, owing to the climate of the locality during the rainy season, continue to be so. But a further improvement may be expected when it will be possible, next year, to introduce Tansa water into the asylum.

J. L. RIEU,
Secretary to Government.

To
